

Interskill Learning Maps e-Learning Courses to IBM Mastery Test *Test Z01: IBM System z Entry Level for z/OS System Programmer Mastery Test*

ATLANTA (January 15, 2008) - Interskill Learning has released a Special Learning Plan mapping specific mainframe e-learning courses to the "IBM System z Entry Level for z/OS System Programmer Mastery Test" (Test Z01).

"Teamed together, the Learning Plan and e-learning courses offer one of the most effective ways of preparing for this important IBM Mastery Test." said Interskill Learning's Vice President, Darren Surch.

IBM actively endorses the "IBM System z Entry Level for z/OS System Programmer Mastery Test" (Test Z01) as the standard for z/OS Mainframe data center personnel. IBM says *"Mastery tests are used to verify the mastery of knowledge covered in a course or a defined set of learning materials. They are not certification tests, which are designed to validate skills needed in a specific job-role. Rather, mastery tests help to assure an individual has achieved a foundation of knowledge and understanding of a subject matter."*

About Interskill Learning

Interskill Learning, headquartered in Atlanta, Georgia, is the worldwide leader in the provision of technology based, mainframe education solutions. Interskill's offerings include a comprehensive range of products:

- **zSeries, iSeries and UNIX courseware:** The industry's most comprehensive, technology-based education offering, encompassing over 150 titles of unmatched depth, breadth and currency.
- **Mainframe Skills Assessment:** Extensive banks of scenario based questions enable an organization to accurately evaluate the strengths and weaknesses of their workforce. Analysis of the data can be used to set benchmarks, identify skill gaps, measure learning effectiveness and calculate ROI.
- **Learning Plans:** Provides individuals with a graphical, defined path of learning activity that offers direction, motivation and lays the foundation for technical competence in their z/OS job role. Can be tailored to reflect your particular systems and/or job role requirements
- **MyInterskill™ Learning Management System:** Delivers e-learning courses, skills assessment, learning paths, mentoring and more – at your personnel's fingertips via the web. Managers designate courses and extract comprehensive reporting on employee progress and results.
- **LMS Interoperability:** Interskill products deploy via any SCORM or AICC compliant LMS.
- **Custom e-Learning Content Development:** We bring our renowned quality to your e-learning project. Let us show you how simply & inexpensively you can have world class e-learning on your topics.
